INTRODUCING AIMS BANGKOK

As one of the data centre pioneers of Southeast Asia, AIMS boasts nearly 30 years of experience in providing premier data centre solutions to businesses around the world. It is headquartered in Malaysia with points-of-presence in major Southeast Asian cities, making it one of the most interconnected data centres in the region.

A carrier-neutral data centre facility located in the central business district, AIMS Bangkok forms a key part of AIMS' interlinked data centre network across Southeast Asia. It affords the same highly diverse ecosystem synonymous with the AIMS name along with an extensive international subsea and terrestrial network that connects Thailand to the world.

Being the point of connection for local and international ISPs and content providers, it is one of the reference sites for the local Internet exchange that provides direct peering privileges for an improved end user experience with lower latency and cost.
